

-IMPORTANT NOTICE- **WATER SERVICE DISRUPTIONS**

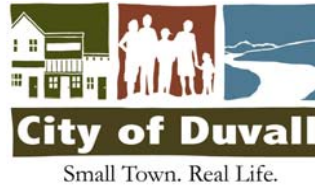

Re: 3rd Avenue Water Main Project

Date: July 2, 2010

This notification is in regards to work that is scheduled on the City's water system that will affect some water services in the City. The contractor on the 3rd Avenue Water Main Replacement Project will be connecting a portion of the newly installed water main and decommissioning the old pipe. This work is scheduled to occur:

Tuesday July 6th, 2010
between 9AM and 6PM

The following map shows affected water services shown in **Yellow**.

While the work is being performed affected water services, shown on the previous map, will be temporarily shut off.

After the work is complete and water service resumes, affected services may or may not experience some discoloration and or air coming from the faucet when water is being used. This is a result of air becoming trapped in between the connection points and also the disruption of water volume in the pipe itself. Often this can be fixed simply by running cold water from an outside faucet, sink or bathtub for 15-30 minutes. If you experience this problem and it persists after taking the above step please contact us at 425-788-3434 to report the problem.

Every effort will be made to complete this work as fast as possible. Please check our website at <http://duvallwa.gov> or channel 8 (Broadstripe customers) for updates. Thank you in advance for your patience.
